Global Companion Diagnostic Market size was valued at \$ 1,678 million in 2018, and is expected to reach \$6,452 million by 2026, growing at a CAGR of 18.3% from 2019 to 2026.

Companion Diagnostic Market Overview:

Companion diagnostic is an in-vitro diagnostic process that provides information about the therapeutic response of a patient for a specific treatment. This test improves the therapeutic efficiency of drugs and decreases overall healthcare cost during treatment. Companion diagnostic is a form of personalized medicine that includes drug-testing, therapies, clinical trials, and research. These further determine therapeutic benefits of the product to patients to outweigh any potential serious side effects or risks.
