Global population growth has fueled the demand for active ingredients in pharmaceuticals. In addition, it is expected that the growing demand for new treatments for the treatment of critical diseases such as cancer will increase the demand for active ingredients. Government approval of new drug systems is expected to drive growth in the pharmaceutical market. Also, the increasing demand for youth products leads to a faster production of active ingredients, which can create growth opportunities. With the advent of specialty drug research and specialty drug development, the market is expected to gain traction in the pharmaceutical industry. The rise in demand for anti-aging products is expected to drive the growth of the personal care sector. There is a limitation in the cost of raw materials which is expected to restrain the market growth. However, changes in lifestyle associated with the growth of cosmetic products are expected to increase the market share and create valuable opportunities.
