Polymer Concrete Market Drivers:

The major drivers for the growth of the polymer concrete market are the increased demand from the construction industry and the growing awareness of the benefits of polymer concrete.

The construction industry is the largest end-use sector for polymer concrete and is expected to continue to drive growth of the market. Increased infrastructure spending in developed economies and rapid urbanization in developing countries are leading to increased demand for construction materials, including polymer concrete. In addition, the growing awareness of the benefits of polymer concrete, such as its superior strength and durability, is expected to drive further adoption in both residential and commercial construction applications.

Regional Outlook:

The global polymer concrete market is classified into seven regions, namely, North America, Latin America, Western Europe, Eastern Europe, Asia Pacific Excluding Japan (APEJ), Japan and Middle East & Africa (MEA).

North America is anticipated to grow at a moderate pace during the forecast period. The US is the major consumer of polymer concrete in the region. The country is also one of the leading producers of polymer concrete globally. The APEJ region is expected to be the fastest growing market for polymer concrete during the forecast period. China and India are projected to be the key contributors to the growth of this market in APEJ. The MEA region is estimated to account for a small share in the global polymer concrete market throughout the forecast period.

Polymer Concrete Market Keyplayers Analysis:

Some of the key players in the polymer concrete market include Fort Composites, Inc., ACO Severin Ahlmann GmbH & Co., KG, Bechtel Corporation, BASF SE, Kwik Bond Polymers, Ulma Architectural Solutions, Bouygues SA., Wacker Chemie AG, Interplastic Corporation, Italcementi. BASF SE is one of the leading chemical companies in the world and has a strong presence in the polymer concrete market. The company offers a wide range of products for various applications including construction, automotive, and packaging.

W. R. Grace & Co. is another leading player in the polymer concrete market with a wide product portfolio for construction and other applications. The company has a strong presence in North America, Europe, Asia Pacific, and South America.

Dow Chemical Company is one of the largest chemical companies in the world with a strong presence in the polymer concrete market. The company offers a wide range of products for construction, automotive, packaging, and other applications.

Pidilite Industries Ltd. is an Indian specialty chemicals company with a strong presence in the polymer concrete market due to its wide range of products for construction and other applications. The company has operations in India, North America, Europe, Asia Pacific, and

Africa.

Key Questions Answered In This Report:

- Covid 19 impact analysis on global Polymer Concrete industry.
- What are the current market trends and dynamics in the Polymer Concrete market and valuable opportunities for emerging players?
- What is driving Polymer Concrete market?
- What are the key challenges to market growth?
- Which segment accounts for the fastest CAGR during the forecast period?
- Which product type segment holds a larger market share and why?
- Are low and middle-income economies investing in the Polymer Concrete market?
- Key growth pockets on the basis of regions, types, applications, and end-users
- What is the market trend and dynamics in emerging markets such as Asia pacific, Latin America, and Middle East & Africa?

Unique data points of this report:

- Statistics on Polymer Concrete and spending worldwide
- Recent trends across different regions in terms of adoption of Polymer Concrete across industries
- Notable developments going on in the industry
- Attractive investment proposition for segments as well as geography
- Comparative scenario for all the segments for years 2018 (actual) and 2031 (forecast)
