

Fi-Med Management Announces The Launch of its Healthcare Mergers & Acquisitions Value Assessment Service

The Mergers & Acquisitions Assessment Service will complement the work M&A teams do by providing a comprehensive assessment of the candidate/organization.

SEDONA, ARIZONA, USA, October 16,

2022 /EINPresswire.com/ -- Fi-Med

Management, trusted experts in the fields of financial healthcare

management, compliance, and risk

assessment, today announced the

launch of a new revenue and risk

assessment service for Mergers &

Acquisitions. "This service evolved

from the work we are doing with

healthcare organizations and

consulting partners," stated Adrian

Velasquez, CEO. "For several years, healthcare organizations have been using our revealMD

technology to gain greater insight into a potential merger or acquisition candidate. With the

reduction in revenues and staffing challenges putting a strain on their ability to effectively

analyze candidate organizations, we saw the need to provide this capability as a service." The

mergers & Acquisitions Assessment service is intended to complement the work M&A teams do

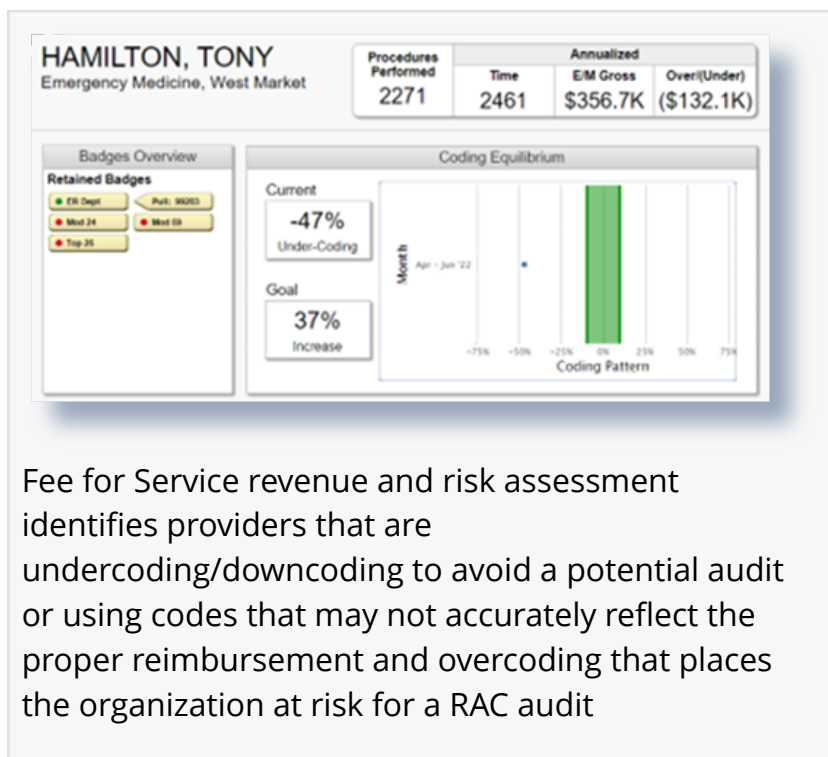

by providing a comprehensive assessment of the candidate organization. By assessing the

potential revenue opportunity for the organization along with potential compliance/audit risk. It

does not matter if the candidate organization is Fee for Service, Value-Based Care, or both; the

Mergers & Acquisitions Value Assessment service is designed to provide a comprehensive

assessment for M&A teams.

Fee for Service revenue and risk assessment identifies providers that are undercoding/downcoding to avoid a potential audit or using codes that may not accurately reflect the proper reimbursement and overcoding that places the organization at risk for a RAC audit

[Fee for Service revenue and risk assessment](#) identifies providers that are

Undercoding/Downcoding to avoid a potential audit or using codes that may not accurately

reflect the proper reimbursement and Overcoding that places the organization at risk for a RAC

audit.

Value-Based Care revenue and risk assessment provides several levels of assessment:

Comprehensive revenue analysis of Value-Based care contracts.

Codes used by providers where there is no Risk Adjustment Factor (RAF) score and the organization would not be reimbursed.

Patients with Gaps in Care leading to revenue loss, patients that have not yet been seen and need to meet with a provider.

HCC audit risk showing if the organization's HCC coding places the organizations at potential RADV audit risk.

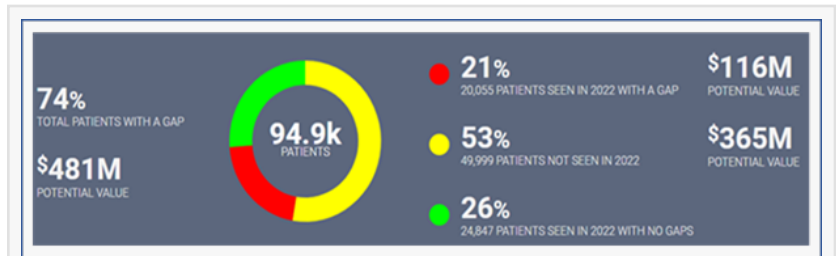

About Fi-Med Management- Our passion is providing healthcare systems with the predictive analytic tools and expertise to transform system-wide data into targeted, actionable direction for their greatest success in revenue generation, risk mitigation, and patient outreach. We have

“

This service evolved from the work we are doing with healthcare organizations and consulting partners who have been using our technology to gain greater insight into merger or acquisition candidates.”

Adrian Velasquez, CEO

served as trusted advisors to health systems for over 28 years. Our team clearly understands the need for data to drive actionable, measurable initiatives that provide the greatest provider engagement and success. Fi-Med, a National organization, has been the recipient of numerous awards and accolades, including the 2006 Award for Business Growth in Wisconsin and the 2006 Congressional Award for Outstanding and Invaluable Service to the Community. In 2007, Fi-Med founders Adrian Velasquez and Christine Krause were selected to receive the Small Business Administration's Small Business Persons of the Year Award.

Value-based Care revenue and risk assessment provides several levels of assessment:

Comprehensive revenue analysis of Value-Based Care contracts
