Covid-19 Scenario of Defense IT Spending Market:

COVID-19 pandemic led to several challenges for the defense IT spending industry such as disruption in the supply chain of essential raw materials, logistics challenges, reduction in defense spending across various countries, and others

On the other hand, the defense IT hardware manufacturers and service providers had to reduce expansion and R&D investments to withstand the decline in revenue and operating performance of the defense industry.

The postponement in purchase orders and slow production rate were some of the challenges witnessed in the defense IT spending market during the year, and are expected to continue for a few years.

The report offers detailed segmentation of the global defense IT spending market based on system, type, force, and region.
