NEW YORK CITY, NEW YORK, UNITED STATES, October 17, 2022

/EINPresswire.com/ -- About the [Drug Eluting Stents Market](#) Report (2022-2032) and Statistics

Drug eluting stents are medical devices used in the treatment of coronary artery diseases. These stents are coated with drugs that help in the prevention of re-narrowing of arteries. The rising prevalence of cardiovascular diseases and the growing demand for minimally invasive procedures are some of the major factors driving the growth of this market.

In 2018, North America held the largest share of the drug eluting stents market, followed by Europe and Asia-Pacific. The large share of North America can be attributed to factors such as the increasing incidence of cardiovascular diseases, favorable reimbursement policies, and the presence of key players in this region.

This growth can be attributed to the rising incidence of cardiovascular diseases, and the growing preference for minimally invasive procedures. Drug eluting stents are coated with drugs that help prevent the re-narrowing of arteries. These stents are used in the treatment of coronary artery disease.
