

# Dry Type Transformer Market Share + CAGR of 6.4% | Key Opportunities and Future Prospect till 2031

*The global dry type transformer market is expected to grow at a CAGR of 6.4% during the forecast period.*

NEW YORK CITY, NEW YORK, UNITED STATES, October 17, 2022

/EINPresswire.com/ -- [Dry type transformers](#)

are used in various industries such as oil & gas, power generation, mining, and others. They offer numerous advantages over other types of transformers such as being fire-resistant and having a lower maintenance cost. The growing demand for energy-efficient equipment is one of the major factors driving the growth of the dry type transformer market.

The rising demand for energy-efficient products and the need for uninterrupted power supply are the key factors driving the growth of the dry type transformer market. In addition, the growing adoption of renewable energy sources is also contributing to market growth. However, the high cost of dry type transformers is restraining market growth. Moreover, the stringent environmental regulations are also challenging the market growth.

The medium voltage segment is expected to witness the highest growth during the forecast period. This can be attributed to factors such as growing industrialization and urbanization, which are increasing electricity consumption.

The Asia-Pacific region is expected to grow at the highest CAGR during the forecast period due to the increasing industrialization and urbanization in countries such as India, China, and South Korea.
