In addition, the research report for Ethylene Vinyl Alcohol Copolymer survey includes information about the most significant claims, latest industry innovations, and future technological developments. The report also saves time and helps you to do basic research. It identifies the market size, growth and key players as well as segments within the global Ethylene Vinyl Alcohol Copolymer market.

The major factor driving the growth of the market is the increasing use of EVOH in food packaging applications due to its excellent oxygen barrier properties. EVOH is also used in automotive, construction, and electrical & electronics applications. The high cost of EVOH is the major challenge faced by the market players. However, the manufacturers are investing in R&D activities to develop cost-effective solutions. For instance, Ineos Olefins & Polymers USA LLC has developed a new technology called “Innovene” for the production of EVOH that uses less energy and raw materials.
