

Newton Wellesley Center for Alzheimer's Care Achieves Deficiency-Free Rating During Annual State Inspection

WELLESLEY, MA, USA, October 17, 2022 /EINPresswire.com/ -- [National Health Care Associates](#) (NHCA) is proud to announce that its affiliate center in Wellesley, MA, [Newton Wellesley](#) Center for Alzheimer's Care, has earned a deficiency-free survey during its annual inspection from the Massachusetts Department of Public Health.

“

Our teams continuously strive to deliver the best in care and service to our residents and families all while adhering to the state requirements.”

Marvin Ostreicher

"A deficiency-free rating is a perfect score, it means that the state inspectors found no shortcomings or issues within the center," explained Marvin Ostreicher, president of NHCA. "Our teams continuously strive to deliver the best in care and service to our residents and families all while adhering to the state requirements. This achievement is a testament to their outstanding efforts."

A deficiency-free rating is one of the top indicators of

excellence in long-term care, and with increasingly stringent regulations, achieving the rating is extremely difficult. During the annual survey, the Department of Public Health evaluates the center for quality, safety, administration effectiveness, cleanliness, nursing care, activity programs, protection of resident rights, and food services.

"Receiving a deficiency-free survey is a great accomplishment," said Marianne Clark, Director of Nursing Services at Newton Wellesley. "We want to thank every team member for the part they played in helping us achieve it. In such an unusual and uncertain time, we are all facing many unknowns, but our staff has remained diligent in their efforts to provide quality care and we could not be happier with the level of success we have achieved."

In addition to this achievement, Newton Wellesley maintains five-star ratings for overall and quality from the Centers for Medicare and Medicaid Services and has a 97% recommendation rating based on feedback from families and residents through a third-party, Pinnacle Quality Insight.
