

Global Plasma Therapy Market Size And Market Growth Opportunities

*Plasma Therapy Global Market Report
2022 : Market Size, Trends, And Forecast
To 2026*

LONDON, GREATER LONDON, UK,
October 18, 2022 /EINPresswire.com/ --
According to 'Plasma Therapy Global
Market Report 2022 – Market Size,
Trends, And Global Forecast 2022-2026'
published by The Business Research

Company, [plasma therapy market size](#) is expected to grow from \$0.36 billion in 2021 to \$0.40 billion in 2022 at a compound annual growth rate (CAGR) of 11.30%. The growth in the market is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The plasma therapy global market is expected to reach \$0.61 billion in 2026 at a CAGR of 11.40%. The rising prevalence of osteoarthritis is expected to drive the plasma therapy market during the forecast period. Platelet-rich plasma (PRP), a type of plasma therapy, is considered a safe and efficient treatment for osteoarthritis. PRP is a concentrated autologous blood growth factor, which is injected on to the joint to provide symptomatic relief by decreasing the inflammation and slows the progression of osteoarthritis.

have been cured of a particular viral infection, as they have antibodies that protect and make them immune to that particular organism. The convalescent plasma is transfused to the patient who is suffering from the viral infection to neutralize the viral infection and induce the active immune response to cure the infection. Convalescent plasma therapy is found to be a safe treatment to cure the patients infected with the coronavirus. Moreover, this therapy was used to treat other viral infections such as Ebola, Dengue, and SARS- 1 but did not give the desired result.

Global Plasma Therapy Market Segments
