

Dermacare BioSciences Acquires Exclusive Distribution for Affordable Emergency Contraceptive “PostDay®-One Step” in USA

DERMACARE BIOSCIENCES ACQUIRES EXCLUSIVE DISTRIBUTION FOR INTERNATIONALLY RECOGNIZED & TRUSTED EMERGENCY CONTRACEPTIVE BRAND, POSTDAY®-ONE STEP FOR USA

DELRAY BEACH, FLORIDA, UNITED STATES, November 16, 2022

/EINPresswire.com/ -- DermaCare Biosciences is proud to announce their appointment as the exclusive USA distributor for [PostDay®-One-Step](#), the Over-the-Counter emergency contraceptive pill that is the best way to prevent pregnancy after unprotected sexual intercourse, contraceptive failure or misuse, or sexual assault.

PostDay® One-Step is an internationally recognized & trusted brand of emergency contraception pills, available in dozens of countries, that helps prevent pregnancy before it starts when taken within 72 hours after unprotected sex. It is NOT an abortion pill.

“Millions of women have safely used the emergency contraceptive pill and there have been no reports of serious complications”, said Kelly Stone, Chief Sales Officer and Partner at Dermacare BioSciences. “Although the emergency contraceptive pill is frequently referred to as a “day after pill”, this is not entirely an accurate description, as women do not have to wait until the morning or day after unprotected sex to take emergency contraception”.

PostDay® One Step is the #1 Internationally Recognized & Trusted Brand of Emergency Contraception

"Actually", Stone goes on to say, "the emergency contraceptive pill, which contains safe 1.5mg of Levonorgestrel, is more effective the sooner you take it – as soon as possible after unprotected sex."

Clinical studies in thousands of women have shown that the emergency contraceptive is up to 87 percent effective in preventing pregnancy. No prescription is necessary for PostDay® One-Step. There is no age or sex requirement and no ID is required to purchase the pill.

"The Over-the-Counter PostDay® One-Step will be available for purchase at all major retailers in every state at up to 60% cost savings compared with other leading brands of emergency contraception", said Stone.

PostDay® One-Step
Levonorgestrel Tablet, 1.5 mg
Emergency Contraceptive

PostDay® One-Step, Trusted by Women Around the Globe, Now Available in USA!

"It is also important to remember that PostDay® One-Step emergency contraception will not work if you are already pregnant and it will not affect an existing pregnancy. PostDay® One-Step will not protect you from HIV infection. the virus that causes AIDS, and other sexually transmitted diseases".

“

The Over-the-Counter PostDay® One-Step will be available for purchase at all major retailers in every state at up to 60% cost savings compared with other leading brands of emergency contraception."
