The market is segmented on the basis of by product type, application, and deployment type. Based on product type, the descriptive segment is anticipated to hold the largest market share as it forms the base for application of prescriptive and predictive analytics. Moreover, by application, the financial management segment is expected to acquire a notable share in the

market owing to the escalating adoption of analytics to detect and prevent healthcare fraud.

Regionally, the market is segmented into North America, Europe, Asia Pacific, Latin America, and the Middle East & Africa. The market in the Asia Pacific is predicted to grow at the highest CAGR over the forecast period owing to the increasing number of government initiatives to reduce healthcare costs in the region. Furthermore, North America is evaluated to occupy the largest market share during the forecast period ascribing to the presence of highly established healthcare infrastructure and widespread adoption of electronic healthcare records.

### Rapid Technological Advancements in the Medical Sector to Drive Market Growth

Technological advancements facilitating information sharing and improved patient's data confidentiality standards are widely being adopted over the last few years, such as the growing involvement of electronic health records (EHR). This in turn is predicted to boost the market growth in the near future.
