# Powerful CB22 Newly Released Centralized Server Management Agent Runs Locally On Each Air-Gapped Machine

US DOD and global military installations eliminate frustrations using CB22's centralized server management agent which runs locally on each air-gapped machine.

KAMAS, UT, UNITED STATES, October 19, 2022 /EINPresswire.com/ -- Corner Bowl Software's CB22, an event log managing system, is changing how military installations and U.S. Department of Defense contractors manage their Air-Gapped consoles at a fraction of competitors' pricing.

The new release of CB22 includes a centralized server management agent which runs locally on each air-gapped machine.

Once installed by the network administrator, CB22 centrally consolidates audit logs, monitors server performance, checks disk space, deletes temporary files and inventories hardware using a single TLS 1.2 TCP/IP port while simultaneously by-passing Windows Security simplifying the hardening process.

> CB22 offers an exclusive feature whereby network administrators can quickly register their Air-Gapped servers using Corner Bowl Software's proprietary Air-Gapped Management Portal, CB22."
>
> *Michael Janulaitis, CEO Corner Bowl Software*

This Air-Gapped management system is further enhanced using a native Windows application that can be installed anywhere and does not rely on an IIS web server and error-prone internet browsers that continually have security holes..

With this exclusive feature, network administrators can quickly register their Air-Gapped servers using Corner Bowl

Software's proprietary Air-Gapped Management Portal, CB22.

Founder, Michael Janulaitis sought to offer a low level, secure product that addresses the financial concerns of organizations as the 2022 recession looms ahead "We've had numerous military customers and department of defense contractors tell us they can't use our competitors' Log Management products because these companies' products use management consoles that run on top of IIS, run within Internet Browsers, often require internet access and typically cost 10 times what we charge at Corner Bowl."

CB22 does just that and more.
