Opportunities and Forecast, 2021 - 2031

Vinyl wallpaper consists of a carrier layer (recycled paper or non-woven wallpaper base) and a decorative layer made of polyvinyl chloride. A synthetic foam layer provides three-dimensional structures to embossed vinyl wallpaper models.

Vinyl wallpapers are ideal for moist areas such as kitchens and bathrooms, as they can be cleaned more thoroughly.

Growth in the number of restaurants and changes in perception about the working environment by private organizations cheer up their employees with a neat and refreshing office interior. The necessity of interior decoration and budget for this purpose varies according to the consumer segment that urges the brands to differentiate offers according to the need of the organization or household. These aforementioned factors increase the revenue of Vinyl Wallpaper Industry.
