Key Trends In The Parathyroid Hormone Market

According to the parathyroid hormone market research, companies are focusing on developing a biosimilar of parathyroid-based drugs. A biosimilar is a biological product that is developed to be similar to an already FDA-approved biologic, known as the reference product. Biosimilars potentially offer consumers the opportunity to reduce their health care costs without compromising on treatment standards, thus parathyroid hormone manufacturing companies are investing in it. For instance, in August 2019, Gedeon Richter announced the launch of biosimilar teriparatide caledTerrosa® in Europe. In August 2020, Cadila Pharmaceuticals has launched a teriparatide biosimilar (NuPTH) meant for osteoporosis.

Overview Of The Parathyroid Hormone Market

The parathyroid hormone market consists of sales of parathyroid hormones and related services by entities (organizations, sole traders, and partnerships) that develop parathyroid hormones to

treat various diseases. Parathyroid hormone is responsible for regulating the distribution of phosphate and calcium in the body and is used in the treatment of diseases such as hypothyroidism and osteoporosis.
