

# What Did Jesus And Mary Really Look Like? New Evidence Revealed

*Author T. O' Donnell reveals evidence of the actual facial appearance of Jesus Christ and his mother, the Virgin Mary, while incarnate on Earth*

LONDON, UNITED KINGDOM, October 20, 2022 /EINPresswire.com/ -- Irish author T. O' Donnell

“

I had the idea to compare and contrast the most likely authentic images, to see if there were common features. I also realised that Jesus would naturally look at lot like His mother.”

*T. O' Donnell*

revealed [evidence](#) of the actual physical appearance of Jesus Christ and his mother, the Virgin Mary, while incarnate on Earth.

Based on comparative picture analysis of extant images and a description by the mystic Blessed Catherine Emmerich, the author claims to have arrived at a reasonable 'photo fit' composite.

"There are many images extant of The Lord Jesus Christ and The Blessed Virgin Mary but no way, to date, of

determining which, if any, are accurate. I had the idea to compare and contrast the most likely authentic images, to see if there were common features.

I discounted the merely artistic works. This narrowed down the field considerably. I also realised that Jesus would naturally look at lot like His mother.

After that, it was easy to come to a reasonable 'photo fit' of how both would have looked while incarnate on Earth."
