

Forward Thinking Systems Introduces Time-Lapse Feature to FleetCam

JERICHO, NY, UNITED STATES, October 25, 2022 /EINPresswire.com/ -- Forward Thinking Systems is proud to introduce the addition of the time-lapse video feature on its [FleetCam](#) and [IntelliHub](#) platform. This new feature allows customers to compress up to 60 minutes of footage into a single 4-minute time-lapse video, enabling users to review key historical moments faster than ever before.

It has never been easier to gain visibility into what is happening in and around the vehicle without spending a lot of time streaming videos. With this new update, users select a point in time and can watch that footage at 15X the speed. Time-lapse is a valuable addition for those who utilize FleetCam and IntelliHub.

"Our new time-lapse feature keeps pushing what's possible on the FleetCam system," says David Isler, CEO of Forward Thinking Systems. "We are always looking for new ways to add concrete value to a fleet manager's toolkit, and this is going to save our customers an incredible amount of time."
