00000-00 000000000:

- The outbreak of the pandemic slowed down the global market growth for treatments of nucleic acid therapeutics, which in turn had a negative impact on the market revenue in 2021 and beyond.
- However, the market has already started recovering at a quick pace and is expected to get back on track very soon.

The global nucleic acid therapeutics market is analyzed across products, application, end-user, and region. The report takes in an exhaustive analysis of segments and their sub-segments with the help of tabular and graphical representation. Investors and market players can benefit from the breakdown and devise stratagems based on the highest revenue-generating and fastest-growing segments stated in the report.

Based on size, the RNA interference [RNAi] and short interfering RNAs [siRNAs] segment contributed to more than half of the global nucleic acid therapeutics market in 2021, and is expected to dominate by 2031. However, the Anti-Sense Oligonucleotides (ASOs) and DNA Aptamers segment would showcase the fastest CAGR of 12.7% throughout the forecast period.

Based on application, the monogenetic disorders segment held more than three-fourths of the total market revenue in 2021, and is expected to dominate by 2031. The multi-genetic disorders segment, however, would manifest the fastest CAGR of 12.8% throughout the forecast period.

Based on end user, the hospitals and clinics segment held nearly three-fourths of the total market revenue in 2021, and is expected to dominate by 2031. The same segment would also manifest the fastest CAGR of 12.0% throughout the forecast period.
