

Chicken Based Ingredients Market Projected To Reach Approximately USD 2,982.5 Million By 2030

Global chicken based ingredients market size was valued at \$1,364.7 Mn in 2020 & is projected to reach \$2,982.5 Mn by 2030, registering a CAGR of 8.4%

PORTLAND, OREGON, UNITED STATES, October 25, 2022 /EINPresswire.com/ -- Chicken based ingredients are derived from chicken through a variety of processes, including rendering and extraction. Chicken based ingredients are used to enhance the flavors and textures of the dish. These are also used in pet food and as a food supplement.

The rapid evolution of consumer preferences is one of the major factors driving innovation in the food & beverage industry. At the moment, market trends for chicken based ingredients indicate that demand for these ingredients is expected to experience an increase in the coming years, owing to a steady rise in the number of health-conscious people around the world, as well as surge in awareness about the benefits of these ingredients. As a result, in recent years, chicken-based ingredients have grown in popularity.

According to chicken based ingredients market analysis, the market is segmented on the basis of type, application, distribution channel, and region. On the basis of type, it is categorized into oil, broth, fat, and protein. As per application, it is divided into food & beverage, animal feed, biodiesel, and food supplement. According to distribution channel, it is fragmented into hypermarkets & supermarkets, convenience stores, specialty stores, and online sales channel. Region-wise, the chicken based ingredients market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Various types of chicken based ingredients available in the market include protein powder, broth, fat, oil, bone broth, and protein.

By type, the fat segment was the highest revenue contributor in 2020 attributed to the fact that chicken fat is used in producing oil and protein which is used in food & beverage and food supplements industries.

By application, the food & beverage segment held the largest chicken based ingredients market share as chicken based ingredients are used in various dishes on a large scale. By distribution channel, the specialty stores segment led the market according to chicken based ingredients market forecast, owing to the availability of a large variety of chicken based ingredients in these stores.

Government initiatives to promote agricultural business have increased investment in agribusinesses. This is anticipated to aid in the combat against rise in food demand and may fuel the market for chicken based ingredients. Furthermore, the surge in preference for high protein intake from dietary products has increased the demand for chicken based ingredients, which may provide a positive outlook in this market.

In addition, the enhanced use of animal feed is expected to increase the demand for chicken based ingredients. The consumption of chicken based ingredients has increased due to the removal of traditional and cultural barriers, as well as the expansion of fast-food chains, which is

expected to fuel the expansion of the market.

On the contrary, the market for chicken based ingredients is expected to be hampered by strict regulations governing quality standards and clean labelling. Furthermore, rise in health consciousness as a result of excessive consumption of chicken based ingredients, as well as surge in consumer awareness of ethical and religious beliefs, are likely to obstruct the growth of the chicken based ingredients market.

Key findings of the study

The global chicken based ingredients market size was valued at \$1,364.7 million in 2020, and is projected to reach \$2,982.5 million by 2030, registering a CAGR of 8.4% from 2021 to 2030.
