

# Ki Liquid Engineering builds NEW State-of-the-art laboratory.

*New laboratory to develop new innovative car care and cleaning products for Ki Liquid Engineering.*

SANTA FE SPRINGS, CALIFORNIA,  
UNITED STATES, October 26, 2022  
/EINPresswire.com/ -- Ki Liquid

Engineering completed construction of

a new state-of-the-art chemical laboratory. The new lab will provide additional support to its growing customers and products demand. According to Eddie Llamas, President of Ki; he states, "this lab has been long in development to remain as an innovator in chemical formulation and blending."

“

We are excited to have a state-of-the-art laboratory to help develop custom new chemicals to provide our customers with the best car care products and polishes as well as documentation support.”

*Eddie Llamas*

Ki Liquid Engineering is a chemical formulation, blending, and bottling manufacturer. They have been manufacturing car care products for industry car wash bays & tunnels as well as products for consumer products and detailers alike. Ki has been in private brand development for more than 30 years. Manufacturing various chemical products for cleaning, degreasing, solvents, to specialty chemicals for various industries including Household cleaning, Janitorial, to Commercial/Industrial chemicals. In addition to their custom product formulation, they also specialize in custom

tolling/blending and co-packing services.

“The new laboratory will allow Ki Liquid Engineering to provide chemical certifications, analysis, and maintaining the highest product quality for our customers”, stated Alex Ozkaya, Vice President of Operation. “Customer service and product quality is our highest company commitment, and we take great pride in those high standards.” The new cleanroom lab was an extension to their current 50K square foot factory and is already fully functional.
