

Gluten Free Flour Market to Reach \$5.6 billion by 2030: IndustryARC

Increased demand for bakery products during the holiday season, as well as an increase in health-related issues, have aided the product's growth.

HYDERABAD, TELANGANA, INDIA, October 26, 2022 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that the [Gluten Free Flour Market](#) size was estimated at \$5.6 billion in 2020, projected to increase at a CAGR of 8.1% during the forecast period 2021-2026. The increased

prevalence of celiac disease, as well as

a growing population turning to healthier diets, are driving the Gluten Free Flour Industry.

Gluten-free flours such as almond flour, sorghum flour, buckwheat flour, brown rice flour, bean flour are a type of flours that has been produced for those who are gluten-intolerant. Gluten is a protein present in grains such as wheat, barley, rye, and triticale (crossbreed). Its principal function is to give dough elasticity, which is subsequently used to make a line of products by giving them a chewy texture and keeping their shape.
