As per The Business Research
Company's "Blockchain Technologies
Global Market Report 2022", the

blockchain technologies market size is predicted to reach a value of \$5.49 billion in 2021 to \$8.61 billion in 2022 at a compound annual growth rate (CAGR) of 56.90%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The blockchain technologies market is expected to reach \$48.39 billion in 2026 at a CAGR of 54.0%. The blockchain technologies market is expanding as a result of rising population, shale oil drilling, manufacturing expansion, and cheap gasoline costs.

Overview Of The Blockchain Technologies Market

The blockchain technologies market consists of sales of blockchain technologies and related services. Blockchain is a technology that involves the implementation of a distributed database that is accessible to all users over a network. Each user can add a new data record (block), with a timestamp that cannot be altered. Each new block forms a part of the universally acceptable depository. Blockchain technology maintains the authentication of data by restricting changes in the older data blocks while allowing the users to continue adding new data blocks thus, making
