SEATTLE, WASHINGTON, UNITED STATES, October 28, 2022

/EINPresswire.com/ -- The [Durable Medical Equipment Market](#) Industry research forecast to 2022-2028 provides comprehensive market data to assist businesses in developing growth strategies and making better business decisions based on forecasts and market trends. Marketing variables in the study include the dynamic market structure, the product offerings of key players, their difficulties, technical innovation, roadblocks and hurdles, data on communication and sales, sales by country, risk, prospects, competitive landscape, growth strategy, and others. It goes into great detail about the market's current and future state. The study looks at a variety of factors, including levels of development, technological advances, and the various business models used by the market's current top players.

Durable medical equipment (DME) are non-disposable equipment used in hospitals, clinics, and home care settings. Examples of DME are wheelchairs, walkers or hospital beds. DME used at home care settings are paid under Medicare part A and part B plans. Coverage for DME may include, wheelchairs, oxygen equipment, blood testing strips, crutches, and power mobility devices. This market has a strong reimbursement background which may expected to have some impact on the overall market. The patient's medical practitioner must prescribe the specific durable medical equipment and it will need to be approved by Medicare before purchasing. Medicare is taking initiative to promote competitive bidding to bring its reimbursement in line with other payers, thus can negatively impacted some DME distributors and manufacturers. For instance, In December 2015, Centers for Medicare and Medicaid Services (CMS) issued a new rule establishing a prior authorization process for certain durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS).
