The VHF air ground communication stations market is expected to witness significant growth in coming years. Adoption of total airport management (TAM)-elevating demand of comprehensive communication network, change in consumer dynamics, privatization of airports, arrival of electric vertical takeoff & landing vehicles (eVTOL), and air taxi are anticipated to support business potential within the VHF air ground communication stations market during the forecast period. Aggressive initiatives by federal organizations such as FAA and Euro control to standardize protocol and establish globally accepted policies to support global growth. As of June 2022, 45,000 flights were handled by FAA per day, with 520 airport traffic control towers, 147 terminal radar approach control facilities, and more than 14,000 air traffic controllers.

To fulfill the changing demand scenarios, market participants are concentrating on product launches to offer a diverse range of products and meet new business opportunities. In addition, market participants are continuously focusing on contracts and partnership efforts to match changing end-user requirements and improve the growth of the VHF air ground communication station market.
