Veripath is a Canadian alternative investment firm focusing on farmland. Veripath believes that there are a number of factors that are supportive of the Canadian farmland investment premise, a few of which are highlighted below:

- Value: Canada has some of the most competitively priced farmland in the developed world – particularly on a productivity adjusted pricing basis.
- Diversification: Farmland exhibits low correlation to traditional stock/bond investments so can improve portfolio risk diversification.
- ESG: Western Canadian zero-till portfolios capture material amounts of carbon.
- Inflation Hedging: Farmland has historically had strong inflation/stagflation hedging capabilities and outperformed in real terms during periods of low real rates/high inflation.
- Demand: Farmland is a non-volatile way to capture the anticipated incremental demand coming from population growth and growing demands for food, feed, fuel and water globally.
