

# Global Smart Washing Machines Market Growth Trajectory

*The Business Research Company's Smart Washing Machines Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026*

LONDON, GREATER LONDON, UK,  
October 31, 2022 /EINPresswire.com/ --  
As per The Business Research Company's "Smart Washing Machines Global Market Report 2022", the [smart washing machines market size](#) grew from \$14.87 billion in 2021 to \$15.93 billion in 2022 at a compound annual growth rate (CAGR) of 7.1%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The smart washing machine market is expected to grow to \$20.83 billion in 2026 at a CAGR of 6.9%. The increasing need for energy-efficient washing machines will drive the growth of the smart washing machines market in the forecast period.

Reports have been updated with the most recent Ukraine-Russia War impact on market growth for all 27+ industries. Reports also provide possible solutions and opportunities for surviving this crisis."

Key Trends In The Smart Washing Machines Market

Artificial Intelligence is expected to be a trend in the smart washing machine market. AI uses a simulation of human intelligence into the machine. These machines are programmed with AI technology to think and function like humans.

Overview Of The Smart Washing Machines Market

The smart washing machine market consists of sales of smart washing machines and related services. The sales comprise revenues generated by establishments that are primarily engaged

in the manufacturing and selling of smart front load, Inclined Load, and top load smart washing machines. A smart washing machine is defined as a machine that helps the user to control the washing process remotely. Smart washing machines are connected to the internet and smartphone, or other smart devices through the cloud or app. The connectivity gives more control to the machine, and the user can decide its activity through the commands on the app or through other means like voice.
