

The Tokyo Sustainable Seafood Summit (TSSS)

The TSSS is the largest sustainable seafood event in Asia. This year's theme is "Designing a Blue Ocean Strategy for the Seafood Industry."

TOKYO, JAPAN, November 2, 2022 /EINPresswire.com/ -- The Tokyo Sustainable Seafood Summit (TSSS) is the largest sustainable seafood event in Asia, and it has been held every year since 2015. It has focused on environmental sustainability and social responsibility and aimed at the realization of a sustainable seafood industry. Various leading organizations in areas such as domestic and overseas seafood industries and stock management, companies and bodies with blue finance expertise, and NGOs have used the event as a chance to share the latest knowledge.

In 2021, we changed the name of the event from a "symposium" to a "summit" in recognition of its strengthening role as an accelerator of the sustainable seafood movement. In 2024, the TSSS will celebrate its 10th anniversary, as it steadfastly moves toward realization of a sustainable and bountiful ocean. Nikkei Business Publications will continue to deploy the TSSS as a powerful stage for building a sustainable seafood industry with all involved.

□About the Tokyo Sustainable Seafood Summit (TSSS) 2022 (finished)

This year's theme: Designing a Blue Ocean Strategy for the Seafood Industry

Subtitle: Labor Rights, Biodiversity, and Climate Change—the Nexus of the Sustainable Seafood Movement

Global collective efforts to establish a sustainable and responsible society continue to address important issues such as climate change, biodiversity, and natural capital protection, as well as labor rights throughout global supply chains.

Our ocean faces numerous ecological, economic, and social challenges, and collective action is more important than ever. The ocean is a cradle for living creatures, and it captures and stores greenhouse gases as "blue carbon." At the same time, the seafood industry's supply chain faces human rights issues, as well as challenges such as declines in wild fish stocks and the number of fishing workers. Rising fuel and feed prices due to geopolitical risks have also put pressure on the seafood industry, posing challenges to food security. The time has come for financial institutions to invest in the ocean while assessing both risks and opportunities.

The Tokyo Sustainable Seafood Summit 2022 featured a wide range of experts from

international organizations, governments, companies, financial institutions, NGOs, and other bodies to discuss a path to carve out a new area of Blue Ocean Strategy for the seafood sector.
