Concrete market includes revenue generated by sales of ready-mix concrete and precast products & elements. Ready-mix concrete is a mixture of cement, sand, water, aggregates, and sometimes binding adhesives. It is manufactured in batches at a central plant instead of mixing it on the job site. It is then transported to job site generally using mobile concrete trucks or trailers. In addition, precast products include paving stones & slabs, bricks, AAC blocks, and other similar products that are generally manufactured in bulk quantity, whereas precast element includes façade, floor, building blocks, pipe, and other similar products. These elements are generally used in construction of large infrastructures such as bridges and water management systems.
