Commonly observed types of flushing system are gravity flush, dual flush, pressure-assisted flush, tornado flush, and others. Among these, the gravity flush segment accounted for highest market share in 2021, in terms of revenue. This is attributable to its inexpensiveness, easy maintenance, and durability.

The market is analyzed with respect to different technology type such as manual, sensor, remote control, and waterless flushing technology. Among which, manual segment has the highest revenue share in 2021. Owing to its inexpensiveness, easy usability, and durability. And by installation type, market is based on based on surface flush, rear wall mounting, and others. The market is mainly driven by rise in construction of residential and non-residential buildings, immigration, and home renovation. However, low population growth rate constraints the Europe Flushing System Market growth.

In 2021, Germany dominated the Europe flushing system market share, in terms of revenue. Moreover, the market in rest of Europe segment is anticipated to grown with high CAGR, owing to growth in use of flushing systems in the residential and non-residential housing construction by private as well as public sector.

The increased awareness among public in general, regarding water prevention has fueled the demand for more efficient flushing systems that use less water such as dual flush and tornado flush system. Further, rise in spendings on home remodeling activities in Europe is anticipated to add to the demand for flushing systems that are aesthetically appeasing. Such factors are anticipated to drive the market growth during forecast period.

Moreover, technological advancements, that have enabled the creation of advanced and smart toilets are anticipated to provide lucrative opportunities during the forecast period.

Furthermore, on the basis of end users, the residential segment is anticipated to grow rapidly, during the forecast period, owing to launch of many affordable housing schemes across many countries in Europe.

Key manufacturers in the market are adopting various strategies to sustain the competition in the market. For instance, in September 2020, Toto Europe GmbH launched a rimless toilet featuring with a tornado flush system. This prevents the growth of bacteria and pathogens in the toilet bowl.
