Dyes & Pigments Market Size is expected to reach USD 39.09 Bn in 2021, And is expected to reach USD 56.2 Bn by 2029, exhibiting a CAGR of 4.10%

NEW YORK CITY, NEW YORK, UNITED STATES, November 2, 2022

/EINPresswire.com/ -- The forecast period will see Dyes and pigments

grow faster than inorganic ones. This can be explained by the growing awareness among consumers about the harmful effects of inorganic dyes. It is also due to an increase in Dyes and pigments being used in printing inks and a growing food & drink industry that uses such pigments as coloring agents. Furthermore, government acts and regulations such as Code of Federal Regulations (CFR), Generally Recognized and Safe (GRAS), and FFDA drive the pigments market.

Dyes & Pigments Market Growth

Inorganic colors held the largest revenue share in 2021. They are also expected to keep their position over the forecast period. It can be attributed to their cost effectiveness, increasing industrial use due to their high opaqueness lightfastness and fade resistance and insolubility; as well as the growing demand for high-performance inorganic colors in surface coatings. India's dyes and pigments are being increasingly used in surface treatment because of their improved aesthetics.
