Company*

2022”, the property management software market is expected to grow from \$1.69 billion in 2021 to \$1.76 billion in 2022 at a compound annual growth rate (CAGR) of 4.39%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, affecting many markets across the globe. The property management software market is expected to reach \$2.18 billion in 2026 at a CAGR of 5.40%. The increasing investments in smart cities is expected to propel the growth of the [property management software market](#)

[size](#) during the forecast period.

Key Trends In The Property Management Software Market

Artificial intelligence (AI) enabled applications in the property management software market is a key trend gaining popularity in the market. Artificial intelligence (AI) enabled applications assist real estate companies in marketing campaigns, managing property portfolios, leasing, accounting, operations, and many other functions.

Overview Of The Property Management Software Market

The property management software market consists of sales of property management software by entities (organizations, sole traders, and partnerships) that are used by property managers and property owners to maintain and organise their rental properties, accounts, renters, owners, and financials. Property management software reduces the amount of manual effort required for rent collection, maintenance and repair scheduling, and tenant and resident tracking.
