The purpose of the instrument cluster is to give the driver the most current information while driving. All gauges can be used to measure speed, distance, heat, and fuel. Examples of indicator lights include the check engine light and low fuel light, which provide alerts and updates. There are different alerts for different cars. The instrument cluster's gauges are round and most often backlit.

You will find the speedometer, fuel gauge, and tachometer

on the driver's dashboard. They have located directly in front of the steering wheel. The speedometer shows the vehicle's current speed. The fuel gauge shows how much gas you have left. The tachometer shows the speed at which the crankshaft of the engine is turning. The distance traveled by your vehicle is displayed on the odometer.
