

Wireless Broadband in Public Safety Market Value to Gain USD 127.71 Billion by 2030

Rising government initiatives, low cost of bandwidth & networking plans, and rising demand for enhanced security & public safety are major trends in the market.

PORTLAND, PORTLAND, OR, UNITED STATES, November 2, 2022 /EINPresswire.com/ -- Global [wireless broadband in public safety market](#) size was valued at \$18.67 billion in 2020, and is estimated to reach \$127.71 billion by 2030, growing at a CAGR of 21.7% from 2021 to 2030.

Key factors that drive the growth of the wireless broadband in public safety market include rise in adoption of connected devices & integrated sensors and growth in concern of security and public safety. In addition, advancements in communication technology and growth in demand for cost-effective and real-time information fuel the growth of the market. However, slow development rate of telecom infrastructure in underdeveloped nations restrict the market growth. Conversely, increase in government expenditure toward public safety applications and growth in adoption of smart devices in telecommunication network are expected to offer lucrative growth opportunities for wireless broadband in public safety market forecast.
