Rise in demand for rapidly deployable & scalable data centers, surge in adoption of cloud services by SMEs, increase in demand for green data centers, upsurge in expansion of global data center industry players in the South America, and growing investments to develop advanced data centers during the COVID-19 pandemic drive the South America modular data center market. On the other hand, challenges such as transportation and vendor lock-in impede the growth to some extent. However, increasing demand for modular data centers by colocation providers is expected to create lucrative opportunities for the key players in the industry.

The South America modular data center market is analyzed across components, enterprise size, industry vertical, and countries. Based on component, the solution segment contributed to more than three-fifths of the total market share in 2020 and is expected to lead the trail by 2030. The services segment, on the other hand, would cite the fastest CAGR of 17.4% from 2021 to 2030.

Based on organization size, the large enterprise's segment accounted for nearly two-thirds of the total market revenue in share in 2020, and is anticipated to rule the roost by 2028. The SME's segment, however, would grow at the fastest CAGR of 17.9% from 2021 to 2030.
