

Centuries of Aeronautical Stories in a Timeless Book

*Amazing History and Stories Now
Compiled in "Airplane Stories and
Histories"*

TORONTO, ONTARIO, CANADA,
November 2, 2022 /EINPresswire.com/
-- In the history of the world,
eronautics is probably the most mind-
blowing discovery or invention of
humankind ever. Imagine a heavy
material flying thousands of feet above
the ground at fast speeds. How
awesome is it?

But it took two hundred years of
collaborative efforts and extreme
education, experiments, labor, and
studies - even successes and failures - before the aeronautics that we know today came into
existence. Some even placed their lives on the line for the industry to learn new safer ways.

A new book seeks to reveal the many efforts done by amazing men and women who served as
pillars in the industry of aeronautics in the world. The book is entitled ["Airplane Stories and
Histories"](#), written by author Norman Currey, chronicles two hundred years of aviation highlights,
including the exploits of pioneers such as Sir George Cayley, the Wright brothers, Charles
Lindbergh, Wiley Post, Amelia Earheart, R. J. Mitchell, Sir Geoffrey de Havilland, Allan Loughead,
Frank Whittle, and Kelly Johnson.

Notable events and developments are discussed - the first Atlantic flights, World War airplanes,
jet engine development, and post-war designs. It concludes with a discussion of new designs
that will surely spark the interest of readers.

"My goal is for the readers to appreciate the efforts of the men and women who made
aeronautics to what it is today, and to gain more understanding of the industry," says Currey.
