According to industry experts, only 3-5% of all sports bettors are profitable in the long run. Sports gamblers must win at least 52.4% of the time even to be slightly profitable. Exceeding its own client's expectations, WSP closes in on 71% for its clients just before the last quarter of 2022.

To Win Consistently In The Sports Betting Industry It's Vital to Remove Feelings"

The professional sports handicapper experienced a 15-game streak from July 29th-August 12th using their calculated method. The game that initiated the streak was the Braves-1.5 at home who played against the Diamondbacks in which the Braves won by 3 runs. WSP

Founder calculated the Dodger's upcoming hot streak with his own methodical program in which

9 out of the 15 games he won during his streak came from the Dodgers -1.5 absolutely dominating every team they faced. According to the company data, If a client started with WSP on July 29th-August 12th a \$500 bettor would have made a \$7,500 profit, a \$1,000 bettor would have profited \$15,000, and last but not least a \$5,000 bettor would have profited upwards of \$75,000 profit.

Founder, Michael Silletti's expertise is what guides the success of the clients through every occasion. WSP was founded in 2019 after Silletti navigated his own success in the sports betting field through simple financial management. A large part of the success behind Silletti & WSP is financial management knowledge. With over 1800 clients and millions of dollars in profit, this company is betting on itself. Silletti states, "The majority of sports bettors lose money because they are not disciplined and constantly change their betting amounts" eliminating the feelings and favoritism behind certain games is a strategy well practiced among their clients. "That's where we come in and teach money management and discipline. What makes us so unique is that we have our own money management program that has you bet the same amount each and every game consisting of no more than 5% of your bankroll."
