

SyncEzy announces release of a new two-way integration between Procore and Google Drive available now for businesses.

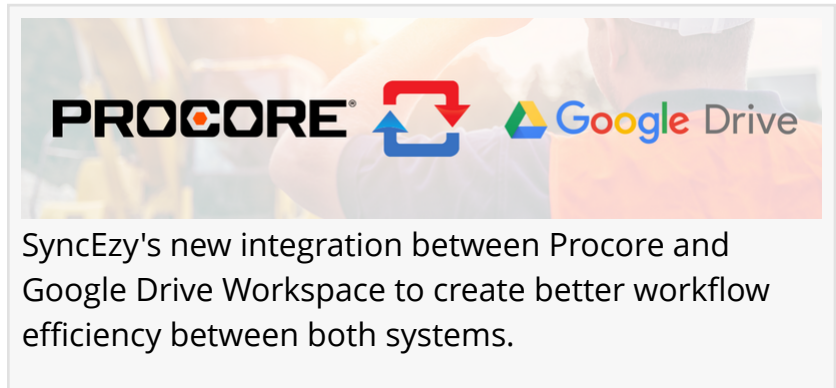

MELBOURNE, VICTORIA, AUSTRALIA,
November 3, 2022 /EINPresswire.com/

-- SyncEzy, the leading global custom integration provider, is excited to announce a partnership with Procore Technologies, Inc., a leading global provider of construction management software. SyncEzy now offers a new two-way integration to sync

Procore's Documents/Photos Tools with select Google Drive Folders. This custom solution allows businesses worldwide to automate version backups with ease while increasing workflow efficiency.

SyncEzy and Procore partnered together in 2018 on a one-way sync from Procore to OneDrive. Fast forward to today, SyncEzy elevates Procore's portfolio of solutions by offering businesses the first two-way integration on the global marketplace. This latest release follows the highly sought after two-way custom integrations between Procore and SharePoint/Teams/OneDrive and DropBox.

Hari Iyer, Founder and CEO of SyncEzy explains, "This integration between Procore and Google Drive allows companies using Google Workspace to integrate their enterprise drives with Procore. Get the best of both worlds, the ease of use in Google Drive and the rigor and collaboration in Procore. The demand for these integrations with Procore came because of the need to streamline the process of saving a version of a document or photo in Procore and working to mirror those saves." He continues, "These integrations help Procore customers gain the ability to not only easily back up their work in an automated, organized manner but also allows them to work on the go without having to worry about saving later on increasing collaboration efficiency. We listen to current and prospective customers' feedback to accommodate repeat requests when we can and a two-way integration between Procore and Google Drive was a highly requested solution. Our team of

Developers worked over a year diligently to design this solution. We are very proud to be the first and only provider of this cutting-edge technology which is exemplary of the quality of work we strive for in all of our solutions by leading the way."

"Procore partners like SyncEzy are helping customers solve the inevitable challenge of data currency and availability when presented with multiple CDEs (Common Data Environments) to manage. These types of integrations give customers the confidence that the right documentation is where it needs to be." Bradley Jacobs, Head of Technology Partnerships at Procore.
