On the basis of delivery, the integrated delivery segment is expected to register the highest growth rate of 9.8% because of the growing use of cloud-based technology in enterprises. On the basis of offerings, the customized interface segment holds a tremendous share of 71% in 2021 as it allows employees to remain engaged in innovative work. Moreover, organizations are more inclining towards customized software in order to receive the products that fit best their needs. On the basis of content, automation is expected to have high scope in the Japan employee engagement and feedback software market. Meanwhile, on the basis of offering, the customized workflow segment leads with the highest share of 30% as it allows various services to the employees, such as digitizing offline awards and easy approval processes.

Based on basis of enterprise size, SMEs hold a strong foothold, accounting for nearly 90%. Therefore, it drives the high scope for the market, while the large businesses segment leads with the highest share of 45% due to growing digitalization in the large businesses and their growing focus on employee engagements and building a friendly environment.

Factors Influencing the Market
Japan employee engagement and feedback software are used to manage hotlines, helpdesk, training tools, etc. The software is adopted to help staff and maintain the workflow of the system by eliminating disruptions. This software establishes a healthy work culture by managing emails and alerting with frequent updates. Apart from that, companies also share occasion-based

emails through the software, majorly on birthdays or work anniversaries. The extensive applications of employee engagement and feedback software are outlining the future of the entire Japan employee engagement and feedback software market.

In Japan, artificial intelligence is gaining significant popularity in organizations. Governments are also emphasizing the increasing penetration of advanced technology. For instance, Japan's artificial intelligence (AI) policy for 2019 has mandated to train of nearly 250,000 employees in data science and AI. Therefore, it will open doors of opportunities for the Japan employee engagement and feedback software market.

Further, businesses in the country are growing at a significant pace, from 23,944 in 2016 to 29,243 in 2018. With the growth in the range of organizations, the scope of the Japan employee engagement and feedback software is high. Additionally, SMEs are maintaining a strong foothold in the Japanese economy, holding nearly 70% of the national employment share. The rising integration of the internet and connectivity is expected to bring a significant uptick in the Japan employee engagement and feedback software market. Additionally, more technologies are being deployed in enterprises to enhance digital integration. Companies are increasingly looking forward to improving employee engagement and productivity.

However, the low working population of Japan may pose a challenge to the Japan employee engagement and feedback software market. Even after having a high range of SMEs, the employees of the nation are actively disengaged at work, which may complicate the growth of the Japan employee engagement and feedback software market.

COVID-19 Impact Analysis
Employee engagement and feedback software witnessed a tremendous rise in terms of revenue because of the growing importance of focusing on input. The Qualtrics and PricewaterhouseCoopers (PwC) report that nearly 95% of IT leaders have started focusing more on employee feedback after the COVID-19 pandemic. Therefore, technology adoption accelerated during the pandemic because it allows employees to put forth their views.
