

With CAGR Of ~35%, Autonomous Delivery Robots Market Size Worth USD 960 Million by The End of 2033

Autonomous delivery robots market is estimated to garner a revenue of ~USD 960 Million by the end of 2033 by growing at a CAGR of ~35% over the forecast 2033

NEW YORK CITY, NEW YORK, UNITED STATES, November 9, 2022

/EINPresswire.com/ -- Research Nester published a report titled "[Autonomous Delivery Robots Market](#): Global

Demand Analysis & Opportunity

Outlook 2033" which delivers detailed

overview of the global autonomous

delivery robots market in terms of market segmentation by type, load carrying capacity, end user and by region.

Further, for the in-depth analysis, the report encompasses the industry growth indicators, restraints, supply and demand risk, along with detailed discussion on current and future market trends that are associated with the growth of the market.

The global autonomous delivery robots market is anticipated to grow with a CAGR of 35% during the forecast period, i.e. 2023 - 2033. The market is segmented by end user into healthcare, hospitality, retail & logistics, and others. Out of these, the retail & logistics segment is attributed to garner the highest market share by 2033, owing to rapid expansion of e-commerce industry and e-shopping. E-commerce in India is expected to be worth more than USD 150 billion by 2025.

The global autonomous delivery robots market is estimated to garner a notable revenue by the end of 2033. Ascribing to the rising affordability and return on investment on several infrastructure light robots, and high requirement for efficient automated deliveries in manufacturing units, the demand of autonomous delivery robots is expected to increase considerably. Along with this, robust growth of the e-commerce industry, and emergence of deep

learning, artificial intelligence, computer vision and robotic mechanics technologies are also expected to accelerate the growth of the market in the forthcoming years.

Geographically, the global autonomous delivery robots market is segmented into five major regions including North America, Europe, Asia Pacific, Latin America and Middle East & Africa region. Out of these, the market in Asia Pacific region is estimate to garner the largest market share by the end of 2033, which is attributed to the surging number of e-shoppers, and rise in number of startups working on autonomous delivery robots in the region. Moreover, the high penetration of delivery robots across end-user industries, such as hospitality and retail and, rising manufacturers and market vendors of these robots in the region are expected to bolster the demand of autonomous delivery robots.

The research is global in nature and covers detailed analysis on the market in North America (U.S., Canada), Europe (U.K., Germany, France, Italy, Spain, Hungary, Belgium, Netherlands & Luxembourg, NORDIC [Finland, Sweden, Norway, Denmark], Poland, Turkey, Russia, Rest of Europe), Latin America (Brazil, Mexico, Argentina, Rest of Latin America), Asia-Pacific (China, India, Japan, South Korea, Indonesia, Singapore, Malaysia, Australia, New Zealand, Rest of Asia-Pacific), Middle East and Africa (Israel, GCC [Saudi Arabia, UAE, Bahrain, Kuwait, Qatar, Oman], North Africa, South Africa, Rest of Middle East and Africa). In addition, analysis comprising market size, Y-O-Y growth & opportunity analysis, market players' competitive study, investment opportunities, demand for future outlook etc. has also been covered and displayed in the research report.

Rise in Online Shopping to Drive the Market Growth

With the rapidly growing e-commerce industry across the globe, the expectations of consumers for faster and frequent deliveries are also rising. But last mile deliveries are one of the biggest problems in handling the supply chain, which is giving impetus to the development of autonomous delivery robots as they are able to travel efficiently in difficult terrains as well. This in turn is anticipated to drive market growth significantly in the near future.

However, the low awareness about robots in developing countries along with absence of high technology and rising concern related to high investments is expected to operate as key restraint to the growth of the global autonomous delivery robots market over the forecast period.

This report also provides the existing competitive scenario of some of the key players of the global autonomous delivery robots market which includes company profiling of Marble Robot

Inc., Aethon Inc., Aitonomi AG, Nuro Inc., Boston Dynamics Inc., JD.com, Inc., Kiwi Campus SAS, Nuro Inc., Piaggio & C. Spa, Postmates Inc., Caterpillar Inc., and more. The profiling enfolded key information of the companies which encompasses business overview, products and services, key financials and recent news and developments. On the whole, the report depicts detailed overview of the global autonomous delivery robots market that will help industry consultants, equipment manufacturers, existing players searching for expansion opportunities, new players searching possibilities and other stakeholders to align their market centric strategies according to the ongoing and expected trends in the future.
