Market Overview:

A growing number of patients are benefiting from cell and gene therapies; previously incurable diseases are finding a cure. Pharmaceutical and healthcare sectors are changing rapidly. With the advent of artificial intelligence (AI) and machine-learning technologies, expectations are rising for more inventive, faster, and less expensive therapeutic development. A data-driven approach could be beneficial to the manufacturing, supply chain, and healthcare ecosystem at large. As a result of increased technology use and data sharing, as well as increased willingness to use prescription and treatment tools, attitudes and behaviors of consumers are changing. Over the next few years, such factors are expected to drive the growth of the pharmaceutical and healthcare markets.
