

# Animal Free Dairy Products Market Size, Business Boosting Strategies, Growth and Forecast 2030 with CAGR of 10.4%

*Growth in consumer preference for a vegan diet is a significant factor driving global animal-free dairy products market revenue growth*

VANCOUVER, BRITISH COLUMBIA,  
CANADA, November 4, 2022

/EINPresswire.com/ -- The global [animal-free dairy products market](#) size is expected to reach USD 60.24 Billion at a steady revenue CAGR of 10.4% in 2030, according to the latest analysis by Emergen Research. Growth in consumer preference for a vegan diet

can be attributed to the steady market revenue growth of animal-free dairy products. In a Global Consumer Survey on diets and nutrition in the United States in 2022, about 5% of respondents identified as vegan. In 2016, 2019, and 2020, The Vegetarian Resource Group and The Harris Poll performed an online survey, and the results showed that 3% of respondents were Americans who were vegans. According to research, the proportion of Americans who identify as vegan increased by 600% between 2014 and 2017, from 1% to 6%. Even though that is a relatively small fraction of the total, other data show that customers who do not identify as vegetarians or vegans are becoming more interested in plant-based diets. Hence, the growth in consumer preference for a vegan diet is leading to a rise in demand for animal-free dairy products, which is in turn driving revenue growth of the market.
