Key Trends In The Fatty Acids Market

Companies in the fatty acids market are increasingly focusing on manufacturing omega fatty acids such as omega-3 and 6 to cater to the growing needs of health-conscious consumers. Omega fatty acids are rich in nutrients that help build and maintain a healthy body. These are

present extensively in fish oils and act as a vital ingredient to the human body and can also be used as dietary or medicinal supplements. Use of Omega-3 and 6 fatty acids help to combat diseases and improve cardiovascular health, promote healthy metabolism, reduce pain and inflammation in joints, increase optimal brain function, and others. According to the World Health Organization (WHO), a Switzerland-based United Nations agency for international public health, 17.9 million people in the world die every year due to cardiovascular diseases. Therefore, rising consciousness regarding health, especially for heart diseases is increasing the need for healthy food habits such as the consumption of healthy fatty acids.

Overview Of The Fatty Acids Market

The fatty acids market consists of sales of fatty acids by entities (organizations, sole traders or partnerships) that produce fatty acids. Fatty acids act as energy for muscles, the heart and other organs, as building blocks of fats in the human body and also as an agent that manages inflammation. Fatty acids comprise of a straight chain of an even number of carbon atoms with hydrogen atoms both along the length of the chain and at one end of the chain, and a carboxyl group at the other end.
