

Kids Nutrition Is Expected to Grasp the Value of USD 86.31 Billion in 2030 : Growth and Revenue Outlook

Rising demand for infant formulas and growing parents' awareness are key factors driving kids nutrition market revenue growth

VANCOUVER, BC, CANADA, November 7, 2022 /EINPresswire.com/ -- The global [kids' nutrition market](#) size was USD 48.89 Billion in 2021 and is expected to register a revenue CAGR of 6.5% during the forecast period, according to the latest analysis by

Emergen Research. Increasing prevalence of childhood obesity and overweight and rising initiatives by governments and regulatory bodies of countries across the globe are major factors driving revenue growth of the market. For example, 2016–2025 nutrition strategy of WHO specifies that it will collaborate with Member States and partners to achieve universal access to nutritious diets from sustainable food systems.

“

Kids Nutrition Market Size – USD 48.89 Billion in 2021, Market Growth – at a CAGR of 6.5%, Market Trends – Increasing demand for personalized kids' nutrition from the North America region

WHO also supports the adoption of guidance and implementation of effective nutrition actions and monitors and evaluates policy and programs for better outcomes.

Market revenue growth is also driven by increasing launch of new and innovative products. For example, in April 2022, Horlicks launched Nutri gummies to meet nutrition demands of children aged 2 and above. which are free of added preservatives, sugar, artificial colors or flavors, and gelatin, among others. Moreover, working parents have a great deal of stress trying to provide a balanced breakfast and lunch for their children. Startups, such as My

Lunchbuddy, develop meal plans that give kids balanced and healthy diets, which saves parents time and effort of researching and creating nutrition regimens for their children.

Rising demand for infant formulas and growing parents' awareness are key factors driving kids nutrition market revenue growth

However, there are significant regulatory gaps in the kid's nutrition sector, which allows low-quality supplements to enter the market and is a key factor expected to hamper revenue growth of the market.
