quantitative assessments have been provided by the report's authors. The SWOT analysis and Porter's Five Forces Analysis are some of the most important components of this report that provide insight into the highly competitive environment of the industry. Rich features of progressive web application, such as push notifications on Android, touch gestures, geo-location, and ability to save icons of PWA on home screens to make

them easily accessible, are making it popular among users. Moreover, another driving factor is that PWAs do have to replace native apps, as they work in tandem with them.

responsive displays with Model-View-View Model (MVVM) (MWWM).

- Dynamic web application is a framework software which controls construction of a web page and facilitates maintenance. Examples of dynamic web application include news apps and e-commerce apps.
- The small- & medium-sized enterprises (SMEs) segment is estimated to expand at the most rapid CAGR during the forecast period, owing to high adoption of progressive web applications. Lack of sophisticated infrastructure and R&D teams in SMEs to develop apps is creating demand for the technology.
