'Don't Worry Design' is a design content market for domestic and foreign users who feel uncomfortable with design services and production. It is an interior-related subscription service for general consumers, and design of space and design promotional materials, production, construction, and supervision of space for global and Korean companies in Southeast Asia.

'Don't Worry Design' has been developed with 'Pocket Company', a start-up company builder, from the spring of this year and is undergoing a closed beta test.

We are looking forward to seeing a design company providing a global business by transforming into a digital design company."

An official from Design I Coop said "It is rare in Korea to provide spatial design content as a subscription service," "We plan to provide differentiated services so that we can achieve good results not only in Korea, but also in the Southeast Asian market with great potential."
