Student Information System Market worth $11.6 Billion by 2026 at a growth rate of 15.6% - IndustryARC

Student Information System Market Drivers Popularity of E-learning solution

HYDERABAD, TELANGANA, INDIA, November 8, 2022 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Student Information System Market](#) size is analyzed to grow at a CAGR of 15.6% during the forecast 2021-2026 to reach $11.6 Billion by 2026. The Student Information System is a designed automated platform that stores data and tracks all student information, including academic terms and programs, assessment scores, attendance records, and more. The growth of the Student Information System Industry is primarily attributed to the prominence of the internet and penetration of smartphone, tab and laptop to enhance student engagement. In addition, the paradigm digital shift of educational institutions, and emergence of Over the Top (OTT) media services are some of the pertinent factors that are estimated to drive the Student Information System Industry. To add more, educational institutions are concentrating to reach students in remote areas to provide quality education and consulting services which eventually lead to the proliferation of the use of SIS software and services for simplifying communication between faculty and students. The growing emergence of cloud-based student information systems and flexible and extensible solution suite built on Artificial Intelligence (AI) to offer data-driven insight and improved enrollment and curriculum management is another major influencing aspect to impact the growth of Student Information System Market. The report offers a complete analysis of the market, its major segments, growth factors, trends, drivers and challengers, key players and more.
