

End User Computing Market Size to Boost \$11.17 Billion By 2026 | CAGR 12.6% - IndustryARC

Rising Trend towards IOT across different End-User Verticals Positively Impacts the End User Computing Market Growth

HYDERABAD, TELANGANA, INDIA, November 8, 2022 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [End user computing Market](#) is anticipated to reach \$11.17 billion by 2026, growing at a CAGR of 12.6% during the forecast period 2021-2026. End User Computing (EUC) encompasses user access to enterprise applications and data anywhere,

anytime, using one or more devices to access virtual desktop infrastructure (VDI) located either at the enterprise's premises or in the public cloud. EUC supports a wide variety of client devices, including conventional PCs, tablets, smartphones, and thin-client terminal devices. EUC devices can be given by the company or brought in by workers or other users as bring-your-own-device (BYOD). With the explosion of mobile devices and the Bring Your Own Device (BYOD) trend, businesses are searching for technologies and techniques to capitalize on digital prospects for business purpose and growth. Moreover, organizations are altering the way their IT teams and business processes work as a result of the introduction of new technologies such as virtualization, cloud computing, and software-defined architectures. End-user computing solutions with revolutionary technologies such as rapid clones, user environment management, and app volumes, guarantee that businesses can streamline desktop and application administration, giving employees with clean and stateless desktops. These stateless desktops may be supplied and deleted in the same amount of time. This enables companies to reduce expenses, increase security, and provide consumers with really tailored assistance. Hence, these factors will drive End User Computing market size in the forecast period 2021-2026. The report offers a complete analysis of the market, its major segments, growth factors, trends, drivers and challengers, key players and more.

Segmental Analysis:

1. Virtual Desktop Infrastructure is anticipated to witness a significant amount of growth during the forecast period 2021-2026. Virtual desktop infrastructure (VDI) is a system that uses virtual computers to offer and manage virtual desktops.
2. End User Computing market is segmented into On-Premise and Cloud. Cloud segment is estimated to hold the highest market share during the forecast period 2021-2026.
3. North America dominated the market by a market share of approximately 30% in 2020. This is due to the rapid development of network technology, the availability of powerful mobile platforms, the expansion of the mobile workforce, and the flexibility of SaaS.
4. APAC is anticipated to have the highest growth between 2021 and 2026, owing to the region's increasing internet penetration and proliferation of smart devices, as well as the region's ever-increasing presence of a large mobile workforce.

Competitive Landscape:

The top 5 players in the End User Computing industry are -

1. IGEL
2. Genpact

3. Tech Mahindra Limited

4. Mindtree

5. HCL Infosystems Limited
