FPT, SEI & Amlogic Co-Launch
the Latest Android TV Set-top-box

Join Us in Meeting Room 115 - Level 1
Demo Day 10th November, Plenara Hall 1 Booth B36

The Latest Android TV Set-Top-Box

In the year 2021, SEI and FPT Co-delivered the world's First Hands-free Android TV Box - FPT Play Box S, the unique device gained great popularity in the APAC market, which combines the best home entertainment service and a hub of AIoT solution, all controlled by integrated far-field microphones and Google Assistant. With modern technology, FPT Play Box S integrates many functions and quality expansion applications, easily connecting shared content from mobile to TV that unites families with new entertainment trends.

SEI is dedicated to delivering streamlined smart home services and immersive TV-watching experiences by offering a smart ATV solution that seamlessly integrates all types of TV program sources combined with smart home functionality, the FPT Play Box S perfectly provides end customers for the Next-Generation Living Room Experience.

In the year 2022, SEI, FPT and Amlogic hand-in-hand roll out the 4K Android TV IPTV/OTT set-top-box - FPT Play 650, running on the Amlogic S905Y4 chipset with Quad-Core Cortex ARM CPU, and is designed exclusively for the Vietnam market for on-demand and linear broadcasting. While meeting the growing consumer demand for digital content, we also ensure the content is secured perfectly, the IPTV is secured by Widevine CAS solution from Viaccess-orca, which provides streamlined cloud licensing for Google's Widevine CAS to greatly reduce the cost of securing PayTV video service and can easily secure the premium content across Android TV STBs.

The Google Widevine CAS solution on FPT Play 650 was integrated by FPT, SEI and Amlogic. It provides a cost-efficient platform for FPT to secure its content and generate new revenue streams. As one of the strategic partners with Android TV, SEI Robotics supports and provides a complete set of live TV business solutions in line with Google Widevine CAS. It is committed to supporting operators to GTM faster and providing the ultimate audio and video viewing experience for the majority of global users and operators.

About FPT

FPT is a pioneer in digital transformation and a leader in consulting, providing and deploying technology and telecommunications services and solutions. We help clients in 26 countries and regions around the globe realize technology-driven business development strategies and goals. With over three decades of experience in implementing projects on a global scale, we help our clients overcome challenges and barriers and achieve peak performance in their digital transformation journey. Based on the latest technologies of AI, Big Data, Cloud, Automation, and IoT, we offer advanced technology solutions and services to help customers operate proactively and flexibly in all situations.
