[Wood Processing Market Trends](#)

The increasing demand for supply chain transparency and stringent government regulations on the wood industry has led to the implementation of tracking and tracing technologies. Many wood companies are implementing their own tracking systems to maintain transparency in their timber supply chain. Electronic tracking is being adopted by wood companies and government agencies over paper-based systems and technologies such as radio-frequency identification

chips, barcodes and advanced traceability software are being used.

Wood Processing Market Overview

The wood processing market consists of sales of processed wood which is treated with preservatives by entities (organizations, sole traders and partnerships) that saw dimension lumber, boards, beams, timbers, poles, ties, shingles, shakes, siding, and wood chips from logs or bolts. The wood processing market is segmented into sawmills and wood preservation.
