Supply Chain Management Software Market Trends

One of the trends in the supply chain management software market has been the implementation of the digital supply chain twin (DSCT). A DSCT is a digital copy of the physical supply chain, which uses the most relevant data. The DSCT is useful for making local and end-to-

end decision making. DSCT can play a role in short-term planning and execution, sales and operations planning, and long-term planning.

Supply Chain Management Software Market Overview
The supply chain management (SCM) software market consists of sales of supply chain management software and related services by entities (organizations, sole traders and partnerships) that produce supply chain management software, including businesses that are involved in design, documentation, installation and support services, production, and distribution of supply chain management software. Companies in this industry undertake operations such as transportation management systems, warehouse management systems, supply chain planning and procurement software for both small- and medium-sized enterprises and large enterprises.
